### DETAILED ACTION

- 1 This action is responsive to the amendment filed on January 16, 2004.
- 2 The cancellation of claims 34-58 is acknowledged. Pending claims are 59-75.
- 3 A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/16/2004 has been entered.
- 4 Claims 59-75 are allowed.

### STATEMENT OF REASONS FOR ALLOWANCE

- 5 The following is an examiner's statement of reasons for allowance:

Nogami et al (WO 98/56337) teaches an aqueous malodor reducing composition (see page 1, lines 9-17). The composition comprises, from about 0.0001 % to about 1% by weight of fragrance materials such as amber and musk (see page 8, lines 7-10) having C log P of not less than 3.5. (see page 7, line 5), from about 0.1% to 35% surfactants such as nonionic, and/or anionic and/or cationic and/or ampholytic (see 8, lines 14-16), diethylene glycol as non-volatile organic compound (see page 20, line 16), alcohol ethoxylates (see page 11, line 16), metal salts such as copper and zinc salts as odor absorbers as well as other adjunct odor-controlling materials, antistatic and insect and moth repelling agents (see page 25, lines 3-7). Nogami also teaches a method for using aqueous malodor reducing composition. The method comprises the step of applying of the composition to the fabrics, households or skin (see page 59, lines 33-35 and page 60, lines 1-11). However, patentee differs from the applicant in that

Nogami et al does not teach or suggest malodor composition comprising hydrophobic fragrance selected from the group consisting of fresh clean spicy, floral, citrus, ozone and marine type perfumes as required in the instant claims. Also patentee differs from the applicant in that Nogami et al teaches non-limiting examples of volatile organic compounds to be used as solubilizing agents that include C1-C4 monohydric alcohols and C2-C6 polyhydric alcohols, which are excluded by the instant amended claims. Accordingly, the claimed subject matter as a whole would not have been obvious to one having ordinary skill in the art of malodor reducing formulations.

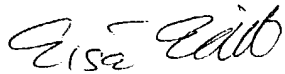

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eisa B Elhilo whose telephone number is (571) 272-1315. The examiner can normally be reached on M - F (8:00 -5:30) with alternate Friday off.
